Professional Summary

Senior Software Engineer with extensive experience building scalable web applications and leading frontend engineering initiatives using JavaScript, TypeScript, React, and Angular. Passionate about creating high-quality user experiences, solving complex technical problems, mentoring engineers, and optimizing modern framework capabilities. Proven track record of driving autonomous architectural improvements, building high-performance component libraries, and collaborating across agile, cross-functional teams to deliver meaningful product impact.

Core Skills

Languages

JavaScript (ES6+), TypeScript

Frontend Engineering

React, Redux Toolkit, Angular, NgRx, Electron, HTML5, CSS3, SCSS, Responsive Design, Accessibility, State Management, REST APIs

Architecture & Scalability

Frontend Architecture, Micro Frontends, Component Libraries, Performance Optimization, Application Scalability, API Integration

Engineering Practices

Code Reviews, Unit Testing (Jasmine), Agile, Scrum, Technical Documentation

Leadership & Collaboration

Mentoring, Autonomous Team Leadership, Cross-functional Collaboration, Stakeholder Communication

Continuous Learning

Modern Web Technologies, Software Architecture, Jest, Storybook

AI Assisted Development

KIRO, AWS Q

Professional Experience

Senior Engineering Lead | Persistent Systems

Apr 2018 – Present

Skills: React, Redux Toolkit, Angular, NgRx, TypeScript, JavaScript, HTML, CSS

- Led frontend architecture and development for enterprise-scale applications using React, Angular, TypeScript, and JavaScript.

- Mentored and supported an autonomous team of 10 engineers through code reviews, technical guidance, and knowledge sharing, improving engineering quality and delivery consistency.
- Identified and resolved performance bottlenecks through API response caching and elimination of redundant requests, improving application responsiveness by 20%.
- Contributed to scaling applications to support an estimated 20,000 additional users across EU and APAC regions while maintaining performance and reliability.
- Used Kiro and AWS Q to understand requirements, explore unfamiliar codebases, support code reviews, and debug issues across enterprise applications.
- Collaborated closely with product managers, designers, backend engineers, and business stakeholders to deliver customer-focused features aligned with product goals.
- Designed reusable UI components and shared frontend libraries that reduced duplication and accelerated development across multiple teams.
- Proactively drove architectural improvements and engineering best practices to improve maintainability, scalability, and long-term product health.
- Led development of healthcare products involving complex workflows and high-volume data visualization while maintaining a strong focus on usability and performance.
- Fostered a culture of collaboration, learning, and continuous improvement through mentoring, technical discussions, and documentation.

Senior Software Engineer | TechJini Solutions Pvt Ltd

Feb 2012 – Apr 2018

Skills: Angular JS, JavaScript, HTML, CSS, PHP, Symfony2

- Built responsive and user-friendly web applications using JavaScript, HTML and CSS.
- Developed and integrated REST APIs in PHP's Symfony 2 framework, collaborating across frontend and backend layers to deliver scalable and user-focused web applications.
- Improved application performance and usability through frontend optimization and engineering best practices.
- Collaborated with cross-functional teams to deliver high-quality product enhancements and customer-focused solutions.

Certifications

- Frontend Angular Competency Level 4 Certification
- High Five Team Award (2023, 2024, 2025, 2026)
- High Five Individual Award (2024)
- Superior Customer Service Award (2017)
- Beyond the Call of Duty Award (2014)
